

**DENSO BUTYL JOINT SEALER**

Pressure Sensitive, Non-Hardening Butyl Compound Strips

**DESCRIPTION & COMPOSITION**

An extruded pressure sensitive Butyl Sealing Strip. A solvent free compound manufactured from a blend of selected butyl rubbers, PIB, polymers, plasticisers, fillers and tackifying resins. The sealer is supplied in the form of triangular strips.

**USES**

The primary use of the Joint Sealer is for the permanent sealing of the joint between the precast manhole sections, it can also be used for the filling of cavities and pitting, and the profiling of weld beads and fittings on steel pipes prior to the overwrapping with the selected Denso Anti-Corrosion Tape.

- Non-hardening
- Easily installed
- Stable over a wide temperature range
- Unaffected by water, mineral acids, alkalis and salts

**SAFETY**

Normal hygiene procedures. Wash hands thoroughly with soap and water or a proprietary hand-cleaner prior to eating. Launder contaminated clothing, gloves, etc.

**STORAGE**

Store in original containers in a cool, dry place away from and sources of ignition.
